Introduction

The Document Container allows users to upload files and make those files available to some or all users on the site. This manual will guide you through how to upload files, how to store files in organized folders, how to create links to resources on the internet, and how to make changes to resources within the Document Container.

Key Information

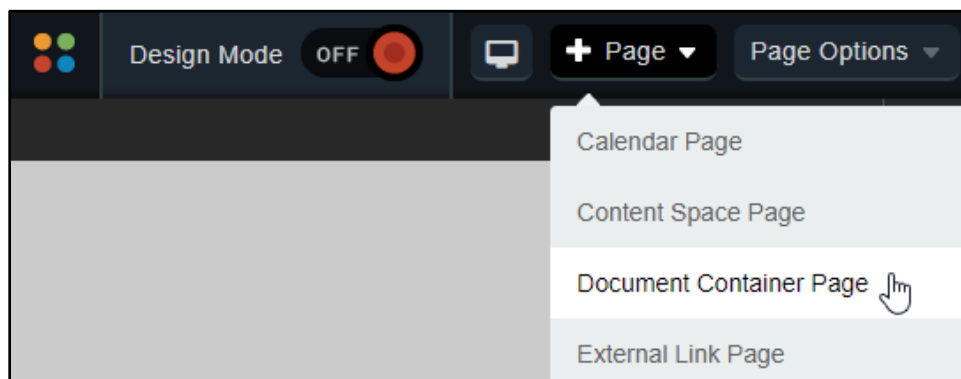

In order to add, edit, or view your **Document Container**, to log in to your site using a **Username** and **Password**.

If you have not yet registered with the site you can request access by clicking the **Signup** button. This sends a request that is automatically routed to an administrator for approval.

LOGIN	SIGNUP
User Name <input type="text"/> Password <input type="password"/> Forgot Password? <input type="button" value="Login"/>	<input type="button" value="Signup"/>

Creating a Document Container

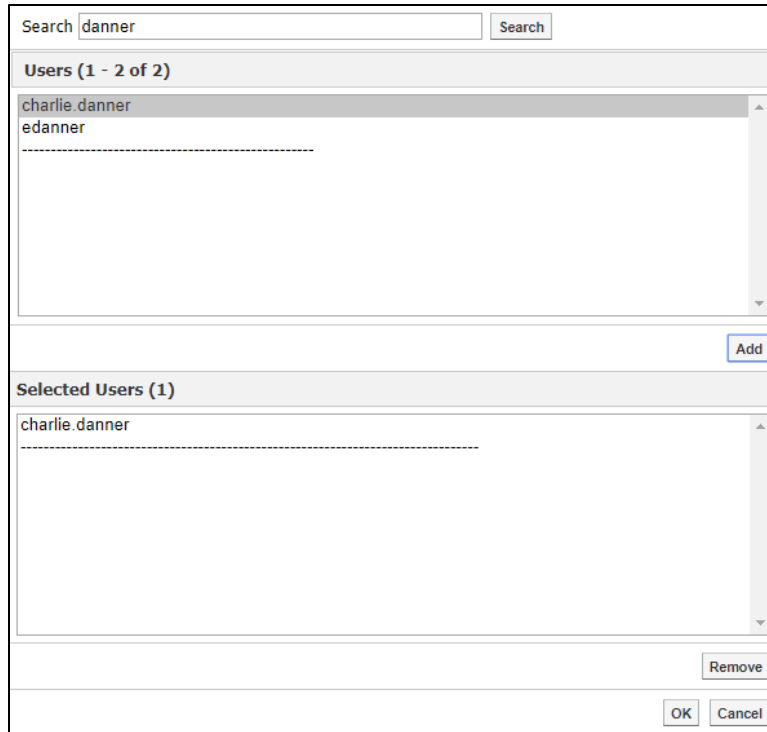

Go to **Page** on the Administrative Toolbar and click **Document Container Page**. Fill in the **Page Name** field for your new page.

The **Page URL** field will automatically be filled in. The **Page URL** is used to build the Friendly URL used to access the page. If you wish to make modifications to the **Page URL**, click  and then you can change the text. Keep in mind that only alphanumeric characters, underscores and dashes can be used. Any other characters will be automatically removed.

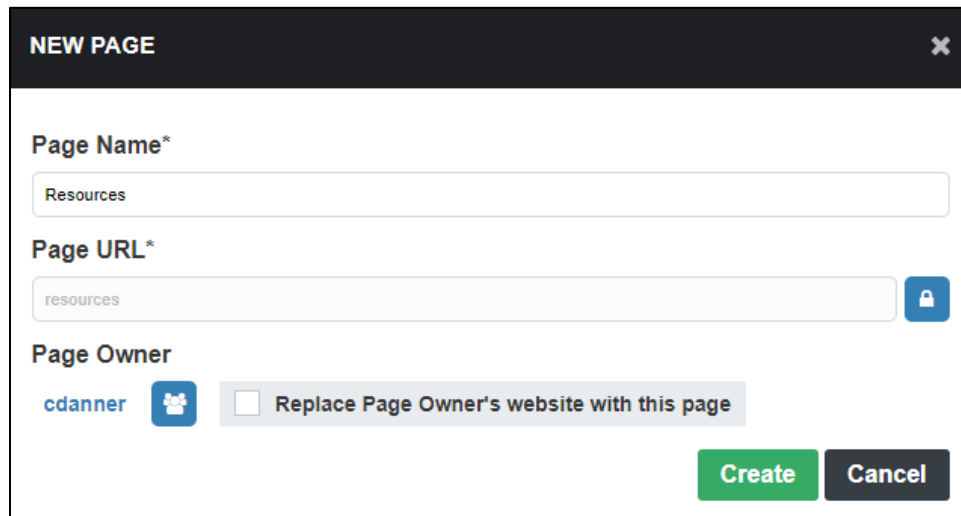

By default, you will be assigned as the **Page Owner**. If you wish to set someone else as the owner, click the  icon.

When the User Picker opens, choose the user you wish to make the owner, and click **Add** then click **OK**.

If you want to set the page as the user's homepage in their user profile, click **Replace Page Owner's website with this page**.

 **Note:** *On some sites, you may also have a Category drop-down that you can use to select a category for the page.*

To finish creating your Document Container Page, click **Create**.

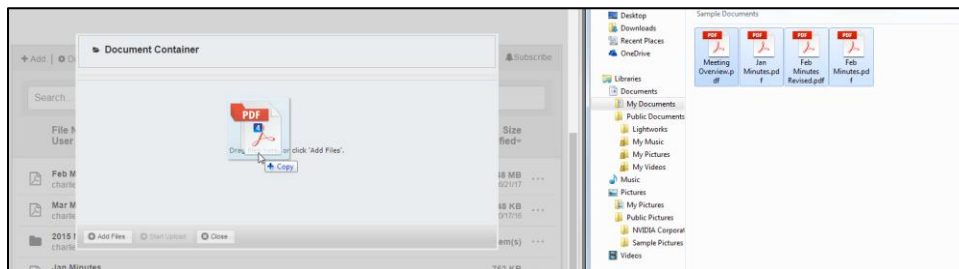

Adding Files

To add files to your container, click the **Add** option and then click **File**.

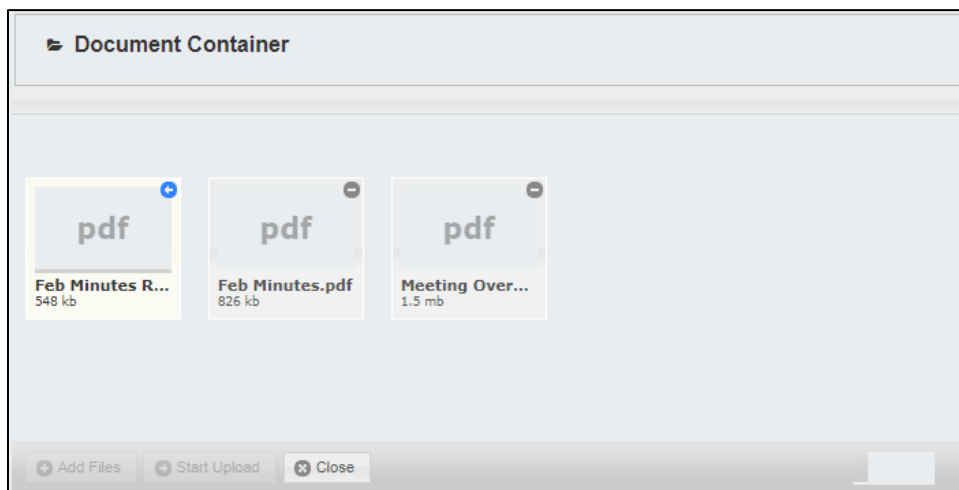

Once selected, an upload box will appear on the page. To add files to upload, click and drag the files you wish to upload in to the upload box. You can drag files one at a time or select a group of files to drag in the box all at once. You can also drag and drop folders in to the upload box.

In addition to dragging and dropping, you can also use **Add Files** to select files you wish to upload.

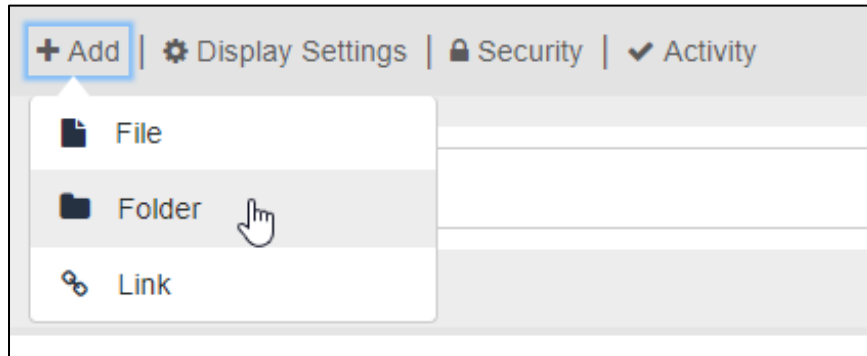

Once you have selected all the files you wish to upload, click **Start Upload**.

Once the files have finished uploading, click **Close**.

Creating Folders

To create a folder for your files, click **Add** and then click **Folder**.

Enter a **Folder Name** to be displayed within the document container.

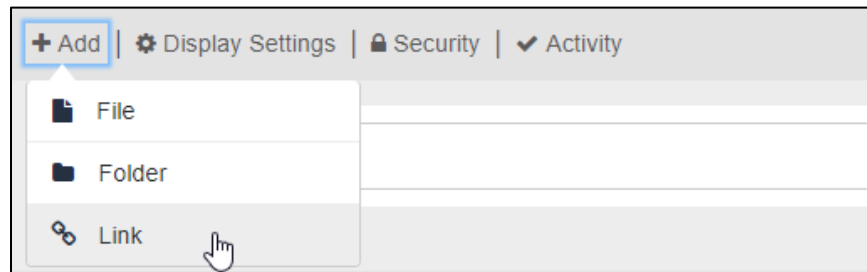

You can also provide an optional **Description** of the folder.

A screenshot of a dialog box titled 'ADD FOLDER' with a close button (X) in the top right corner. The dialog shows a breadcrumb path 'Document Container'. Below this, there are two input fields: 'Folder Name' containing the text '2015 Minutes' and 'Description' containing the text 'The meeting minutes for the 2015 meetings.'. At the bottom right of the dialog, there are two buttons: 'Add Folder' and 'Cancel'.

Click **Add Folder** to create the folder.

Creating Links

To create a hyperlink, click **Add** and then click **Link**.

Give your link a **Link Name** to be displayed in the document container.

Type in the full URL that you wish to link to in the **URL** field.

If you wish, you can provide an optional **Description** to let others know more about the link.

ADD LINK
✕

Cancel

Click **Add Link** to create the link.

Searching for a Resource

In addition to browsing through the document container, you can search for a specific resource you wish to find.

To search for a file, navigate to the folder in the container you wish to search. If you wish to search the entire container, you can do so from the top level of the container.

Typing a full or partial name of a file in the **Search** box and click  to run your search.

 **Note:** When you search a container, the search will normally only look at the name of the resource. However if you have the display settings set to include usernames, you can also search for files that have been uploaded by a particular user.

Sorting Resources

Users have the ability to sort resources by **File Name**, **User**, **Size** and Date **Modified**.

 **Note:** By default, only **File Name** and **Size** are available to a container. However, you can use **Display Settings** to add the **User** and **Modified** fields. Users are not able to sort by fields that are not visible. For more information on configuring which fields appear, please see the [Configuring Document Container Fields](#) section.

To sort the contents of the container by a property, click on **File Name**, **Size**, **User** or **Modified**. This will sort the container by the given item in ascending order. Clicking the item again will sort the contents in descending order.

Managing a Resource

When you click on a file or link within the document container, you will see a number of options available to you. As a guest, you can copy a link, subscribe for updates and download the actual files. These options are also available to a user with full control over the resource but those users have additional options, including editing, moving, and deleting resources, viewing activity and editing file security.

To access these options for a file or link, click on the name of the object. To access these options for a folder, click **...** to the right of the folder.

Copying a Link

To copy a link to a file, folder or link, click on the resource and then click **Copy Link**.

This will copy the link to your clipboard so you can paste it elsewhere.

Editing a Resource

You may wish to change the **Name** or the **Description** of your resource. To do so, click on the resource and then click **Edit**.

You will be taken to the edit window, where you can make changes to the name and description of your resource. In the case of a link, you will also be able to update the **URL** field.

UPDATE FOLDER ✕

➤ Document Container

Folder Name

Description

When editing a file, you will also be able to see the version history of the file.

If you have an updated version of the file that you wish to share, you can use the **Add Revision** interface to add your new version of the file. Either click **Select a File** or drag and drop your file into the **Drag & Drop File Here** box to upload the new version of the file.

Revision created successfully [Apr 2017 Meeting Minutes.pdf]

Drag & Drop File Here

Select a File

Name	Size	Author	Created On	Version #	Action
Apr 2017 Meetin...	358 KB	charlie.danner	2017-07-13 09:52 AM	2	Live Version
Apr 2017 Meetin...	57.8 KB	charlie.danner	2017-07-13 09:51 AM	1	<div style="display: flex; justify-content: center; gap: 10px;"> Make Live Delete </div>

If you wish to make another version of the file active, click **Make Live** next to the desired version. You can also click **Delete** next to any non-live version of the file to permanently remove that version.

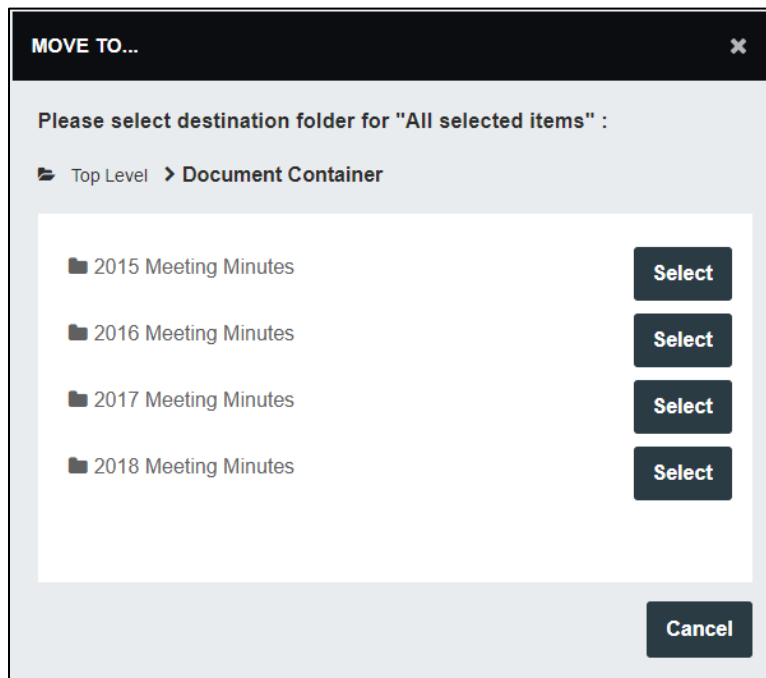

When you have finished your changes, click the **Update** button.

Moving a File or Folder

If you are wishing to move just a single file, folder or link, you can also click **...** to the right of the resource and then click the **Move To...** option.

If you are within a sub-folder and you wish to move the resource to a higher level within the container, use the breadcrumb to choose the level above your desired destination. For example, in the screenshot below, if you wanted to move the file to the main Document Container level, you would click **Top Level** and then click **Select** to the right of **Document Container**.

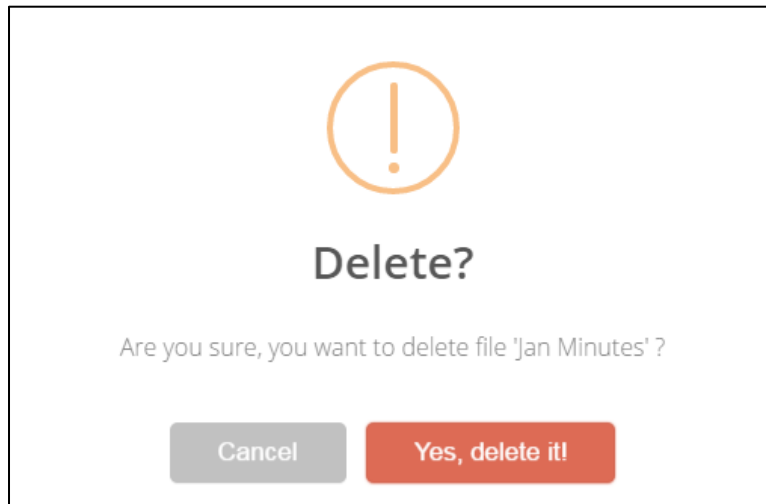

Once you are at the desired level, click **Select** to the right of your destination folder.

You can also move a resource into a folder by dragging and dropping the resource into the desired folder on the page.

Deleting a Resource

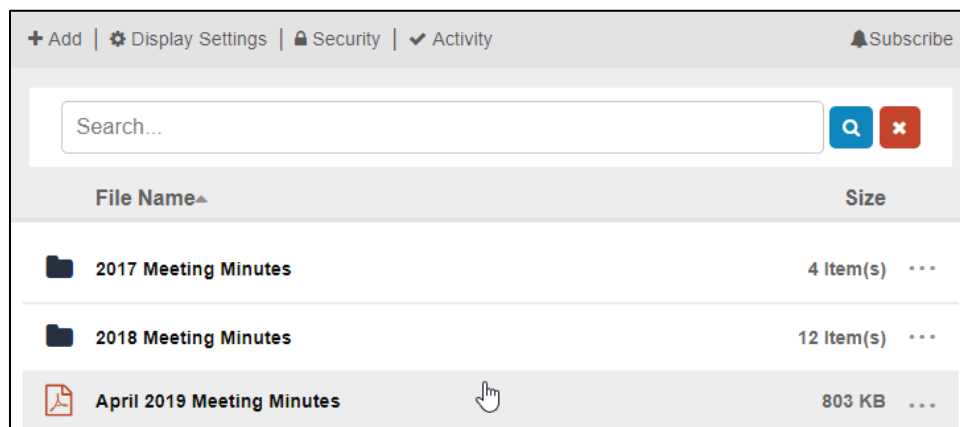

If you wish to remove a resource from your container, click on the resource and click **Delete**.

Confirm your decision by clicking **Yes, delete it!** in the confirmation window. Once deleted, the items are permanently removed, so only delete files you are sure you will no longer need.

Downloading a File

If you wish to download a file, click on the name of the file. Alternatively, you can download the file by clicking **...** to the right of the file's name and then clicking **Download**.

Subscribing to a Document Container

If you want to be notified of any files, folders or links being added or updated on a container, you can use the **Subscribe** button on the top right of the container.

If you wish to be notified when changes are made only for a specific file, folder or link you can click on the resource and then choose **Subscribe**.

If you are signed in, you will be able to choose if the alert is for **My alert online** (accessible at /alerts) or **Email Alerts**.

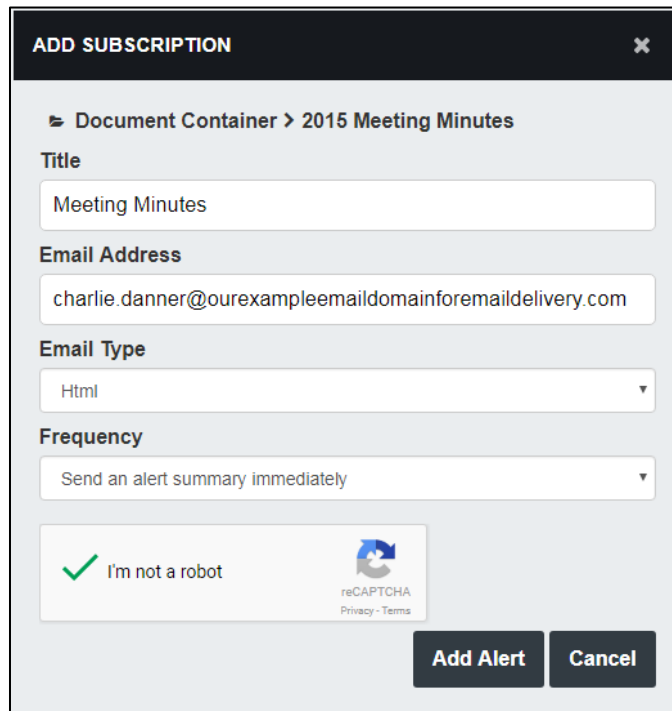

Fill out the desired **Title** and **Email Address** for your alert.

Use the **Email Type** drop-down, choose if you want the emails sent with **HTML** or **Text** formatting.

Use the **Frequency** drop-down to choose if you wish to receive immediate alerts about any update or if you would like to get daily or weekly summaries of any updates.

If you are not signed in, you will also need to check the **I'm not a robot** option for the reCAPTCHA.

 A screenshot of the 'ADD SUBSCRIPTION' dialog box. The title bar says 'ADD SUBSCRIPTION' with a close button. The main content area shows the path 'Document Container > 2015 Meeting Minutes'. There are four input fields: 'Title' (containing 'Meeting Minutes'), 'Email Address' (containing 'charlie.danner@ourexampleemaildomainforemaildelivery.com'), 'Email Type' (a dropdown menu set to 'Html'), and 'Frequency' (a dropdown menu set to 'Send an alert summary immediately'). At the bottom, there is a reCAPTCHA widget with a green checkmark and the text 'I'm not a robot'. To the right of the reCAPTCHA is a 'reCAPTCHA' logo with 'Privacy - Terms' below it. At the very bottom, there are two buttons: 'Add Alert' and 'Cancel'.

Click **Add Alert** to confirm your alert settings.

Viewing Resource Activity

To view activity from signed-in users on a resource, click on the resource and then click on **Activity**.

Configuring Document Container Fields

Administrators have the ability to determine how the Document Container is rendered throughout the site. They can also allow many of these settings to be configured on a per-container basis.

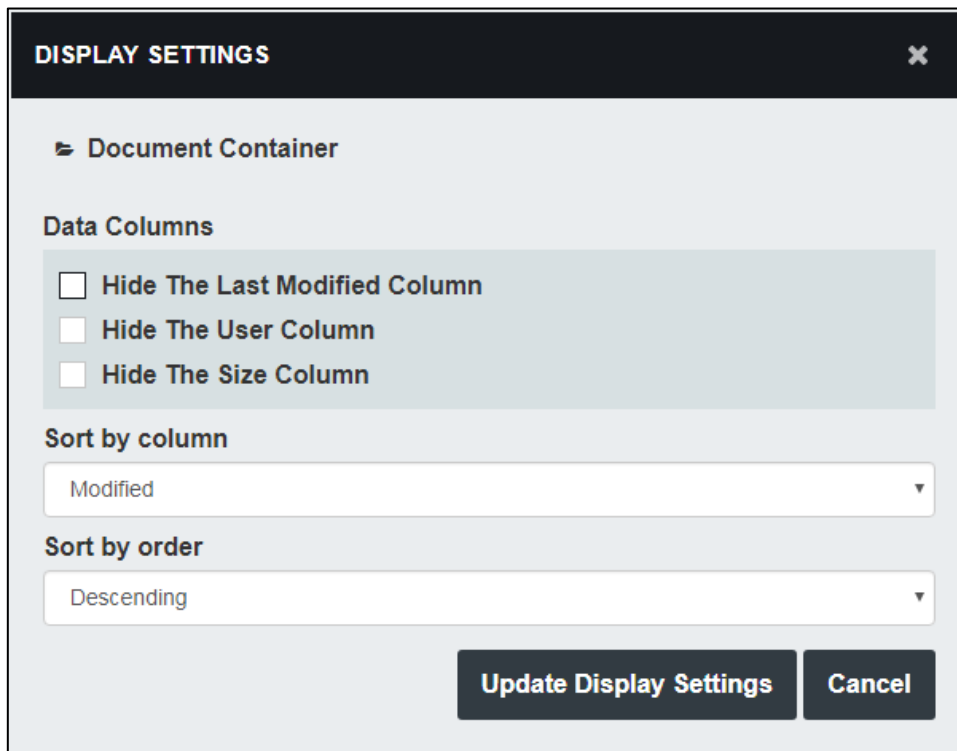

Configuring Display Settings on a Container

If the administrators have enabled the appropriate setting, users with full control on a container will see an option called **Display Settings**. By clicking on this option, they can control which fields are displayed in the container as well as the default sort option that will be used when viewing the container.

To access these settings from the container, click **Display Settings**. If you do not see this option, you can speak with your administrators about the possibility of enabling this option.

When clicking **Display Settings** you will see the following options.

- **Data Columns:** You can use these checkboxes to hide one or more fields within the document container.
- **Sort by column:** Set the sorting default of the items in the document container.
- **Sort by order:** Choose if items should be sorted by ascending or descending order by default.

To save your changes, click **Update Display Settings**.

Configuring Default Display Settings for All Containers

If you are an administrator, you have the ability to configure the display settings for all containers on the site. You can also add the Display Settings option to containers so that users with full control on the containers can choose how to display their container contents.

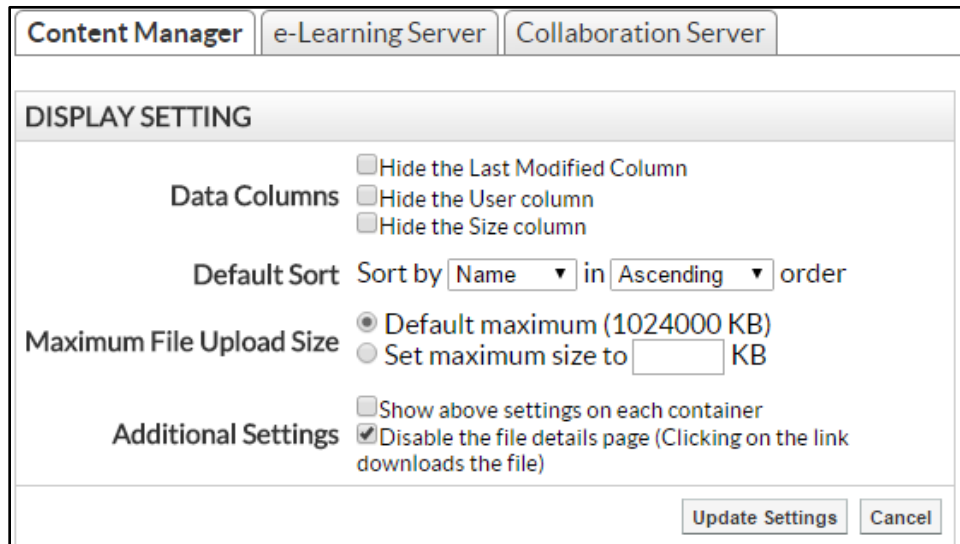

To access the document containers settings, click **Collaboration Server Settings** under **Collaboration Server Administration** on the System Administration page. Choose the **Content Manager** tab.

The customizable settings include:

- **Data Columns:** Allows administrators to determine which document container fields to display for visitors of the site. You can use these options to hide one or more fields within the document containers.
- **Default Sort:** Set the sorting default of the items in the document container.
- **Maximum File Upload:** Administrators can set the maximum file upload size for users. You cannot increase the file size to a value higher than the default maximum.

Additional Settings:

- **Show above settings on each container:** This option will add a new tab called **Display Settings** to each document container on the site. You will then be able to use that tab to configure the **Data Columns**, **Default Sort** and **Maximum File Upload** on individual document containers on the site.
- **Disable the File Details Page:** Instead of viewing the File Details when you click on a file in a document container, you will be able to download the file directly if this option is checked. This allows users to download files with one fewer click.

The screenshot shows a web interface with three tabs: **Content Manager**, **e-Learning Server**, and **Collaboration Server**. The **Content Manager** tab is active. Below the tabs is a section titled **DISPLAY SETTING**. This section contains several settings:

- Data Columns:** Three checkboxes: Hide the Last Modified Column, Hide the User column, and Hide the Size column.
- Default Sort:** Sort by in order.
- Maximum File Upload Size:** Two radio buttons: Default maximum (1024000 KB) and Set maximum size to KB.
- Additional Settings:** Two checkboxes: Show above settings on each container and Disable the file details page (Clicking on the link downloads the file).

At the bottom right of the settings area are two buttons: **Update Settings** and **Cancel**.

Click **Update Settings** when ready to save your changes.
